Particle Board & Engineered Wood Liability Release Form

Dear Customer:

Please take a moment and read the following important information regarding the transportation of non-solid wood furniture:

Furniture items manufactured from press board, particleboard, and/or engineered wood (PBEW) are designed to go into a box from the manufacturer, to the retailer, and then to the customer un-assembled. These items are not designed to withstand the normal stress of a move as an assembled unit, such as regular wood furniture. Most of PBEW furniture is not built/designed with the proper wood/metal structure to brace the unit/piece for movement in and out of a residence, office, or storage facility. PBEW furniture is not designed to withstand the normal truck vibrations and content shifting during transport and physical moving. Usually chips or dents are not repairable. Assembly instructions sometimes suggest that the hardware pieces be glued together, and/or locked into place. This DOES NOT improve the structural integrity of the item, but does make disassembly impossible, without creating substantial damage, usually beyond repair.

Due to these issues we are requesting that you sign this release form.

If I, the customer/shipper, am tendering any furniture constructed from PBEW furniture as a part of my move; I understand that claims for damage to PBEW furniture cannot be made due to the inherent vice of PBEW furniture also due to the inherent susceptibility to damage, as outlined above.
